How To Reset Wiki Password

- **Step 1**: Click the **Login** link at top right of the wiki.
- **Step 2**: Click the **Set new password** link at the bottom of the Home/Login page:
  - 

- **Step 3**: Type your username in the **Set new password** form:
  - 

  - Click **Set a new password**
  - If the username is not found you will get a “Sorry, we can’t find this user in our database”.
  - 

  - If the submittal is successful, the “A confirmation link has been set by email.” will display:
  - 

- **Step 4**: **Check your email**.
  - A confirmation email will be sent to your email address.
  - **Click the link in the email** to confirm the password reset.
  - The wiki will load displaying “Your new password was sent by email.”:
  - 

- **Step 5**: **Check your email again**.
  - There will be an email with the subject “Your DokuWiki password”.
  - Email contains your Wiki username and a randomly generated password.
  - Now you can login with your new password.
  - To change this password to something more memorable, click **Update Profile** link at top right of the wiki.
